INSTALLATION INSTRUCTION

LED Tube Light Install Instructions

● Installation:

1. Please read the instructions before installation.
2. Please cut off the power supply before installation.
3. Choose the lamp holder according to the specification of lamp, please make sure the working voltage is the same as the working voltage signed on the LED tube light.
4. Please supply the power according the schematic of LED tube light(as follow ,choose anyone).
5. Please supply the power after make sure the working voltage is normal ,lamp holder install well.

● Supply power schematic of LED tube light

● Attention:

1. Please connect the power supply according the supply power schematic of LED tube light.
2. Indoor use only, non-waterproof.
3. Please do not open the tube light in order to ensure the lifetime of tube light and safety.
4. Please supply the power after check the holder install well, connect circuit is normal and working voltage is the same as the signed working voltage on LED tube light.
5. Please do not touch the tube light after supply the power.
6. Please remove the ballast(include electronic and inductive)and starter when replace the traditional tube light, make sure the advantage of tube light,like stability, environmental and energy saving, supply the power as the supply power schematic of LED tube light.
